cpi **Product Profiles**

The most complete and concise database of market information on Canada's chemical industry

. . . from **Camford Information Services**, *Canada's leading publisher of chemical marketing intelligence*

To succeed, you must know your competitors and your customers. But market research is expensive and time-consuming.

Each ***CPI Product Profile*** is a handy market study covering a single chemical product. In a few pages, it provides the key information you need for effective marketing — data for the most recent five years and a three-year forecast.

Capacity
Domestic manufacturing capacity, with notes to explain changes in ownership or the unique characteristics of certain facilities.

Imports
Import volumes by country of origin.

Prices
List prices for the most common grades of product, with customary terms of sale.

Supply
Total supply of the product, consisting of domestic production and imports, plus any significant inventory adjustments.

Demand
Total consumption of the product, broken down into key domestic market segments and exports.

Customers
A listing of the major domestic buyers of the product, with an indication of each company's primary end use.

Summary
A brief outline of the key factors affecting the market for the product, as well as a summary of recent business developments and technological changes.
